

TDC Telemedicine Supplemental Questionnaire — Completed Answers

For: Sohan Japa, MD | Agni Health | Filed: 2026

1. Weekly hours dedicated to telemedicine services:

- Telemedicine Hours: **5–10 hours/week**
 - Total Hours (all other): **2–3 hours/week** (admin, documentation)
-

2. Scope of telemedicine services / companies contracted with:

Metabolic health management for adults with prediabetes, type 2 diabetes, metabolic syndrome, and obesity. Services include initial video consultations, asynchronous messaging follow-up, medication management (including GLP-1 agonists and metformin), and lab review. All services delivered via ****Healthie**** (HIPAA-compliant EHR and telehealth platform). No third-party telemedicine staffing companies contracted.

3. Media through which telemedicine services are provided:

- Audio
 - Video
 - Virtual Network
 - Other
-

4. Percentage of telemedicine practice by state:

State	% of Practice
California	100%

5. Accredited telemedicine training program:

- No

(Note for Remarks if asked: Dr. Japa has 4+ years of active telemedicine experience delivering care through the VA San Diego Healthcare System, including video and asynchronous telehealth visits, which provides substantial practical background equivalent to or exceeding formal program training.)

6. Licensed in all states where telemedicine services will be provided:

- Yes (California — CA License A171478)
-

7. Provide telemedicine to patients without a previously established relationship:

- Yes

Agni Health is a direct-to-consumer telehealth practice. New patients are accepted without a prior in-person relationship. All new patients complete a comprehensive intake process via Healthie including medical history, chief complaint, consent forms, and identity verification prior to the first visit.

8. Telemedicine services provided for any other healthcare practice:

■ No

(VA and Mt. Sinai telemedicine activities are covered under their respective institutional policies and are not part of this application.)

9. Delivery limited exclusively to encrypted communication:

■ Yes

(Healthie uses end-to-end encrypted video, messaging, and file transfer. All communications are HIPAA-compliant.)

10. Telemedicine platforms updated on a routine basis:

■ Yes

(Healthie is a SaaS platform; updates are managed by the vendor and applied automatically.)

11. Protocols in place to determine when in-person visit is necessary:

■ Yes

(Clinical protocols include criteria for escalation to in-person care, ED referral, or specialist consultation. Patients are screened at intake and at each visit for acute or emergent conditions.)

12. Advanced practice providers utilized:

■ No

(Solo practice — Dr. Japa is the sole provider.)

13. Obtain informed consent prior to delivery of telemedicine services:

■ Yes

(Telehealth informed consent is obtained via Healthie intake flow prior to the first visit.)

14. Written protocols for medical record documentation and patient follow-up:

■ Yes

(SOAP note templates and follow-up protocols are documented within Healthie EHR.)

15. Specific telemedicine activities:

Activity	Yes/No	Weekly Hours
a. Intraoperative surgical monitoring	■ No	—
b. Remote diagnosis	■ Yes	~3–5 hrs/week
c. Remote prescription of controlled narcotics	■ No	—
d. Medical services not recognized by ATA	■ No	—

(Remote diagnosis = metabolic condition assessment and management via video/async messaging)

16. Credential remote providers:

■ No / N/A (sole provider)

17. Physicians delivering telemedicine on your behalf:

None — Dr. Japa is the sole provider.

18. Certificates of insurance from contracted providers:

■ N/A (no contracted providers)
